

# Improve Your Productivity by Integrating Your Shipping Systems with the New Shipping Module for Transaction Manager™

Everything you need to successfully manage your EDI shipping processes from one source!

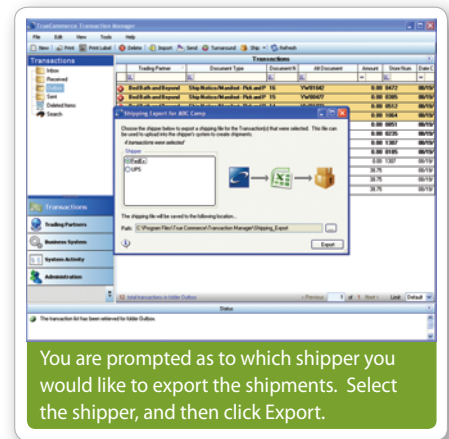

**The Shipping Module for Transaction Manager further strengthens your EDI solution** by providing users the option of automatically importing and exporting shipping data to and from shipping systems.

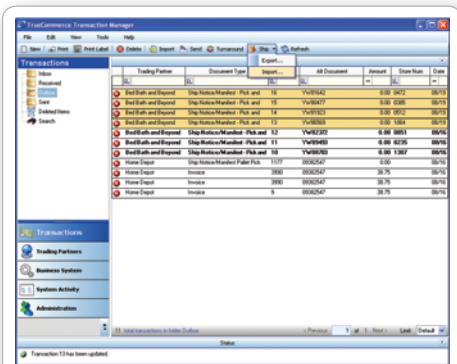

The addition of this module enables users to create a seamless connection between their shipping system and Transaction Manager EDI software to reduce errors and increase business productivity.

## The Shipping Module from TrueCommerce EDI Solutions:

- Provides users with an easy to use interface that enables the export and import of shipping data between Transaction Manager and shipping carrier software.
- Enables users to significantly streamline the shipping process by eliminating manual entry.
- Improves productivity and minimizes errors by automatically transmitting tracking numbers and other shipping data between systems.
- Updates existing documents in Transaction Manager with the key data provided by shipping carriers.

With the increased popularity of shipping direct to customers, the ongoing focus of minimizing input errors and the amount of paperwork generated, it makes business sense to integrate a shipping module with your EDI software package.

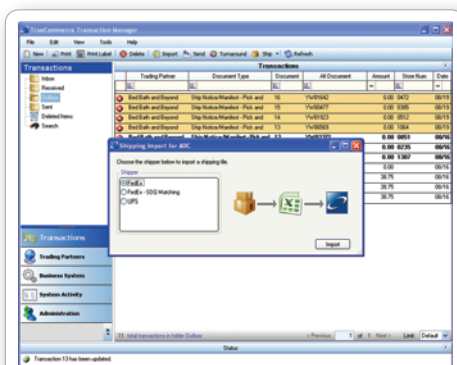

Shipments are processed through the shipping carrier's system and a file is generated from it. You can then import the file into Transaction Manager by going into the Outbox folder and selecting Import.

# The TrueCommerce EDI Solutions Shipping Module Simplifies Your Shipping Processes with Leading Carriers

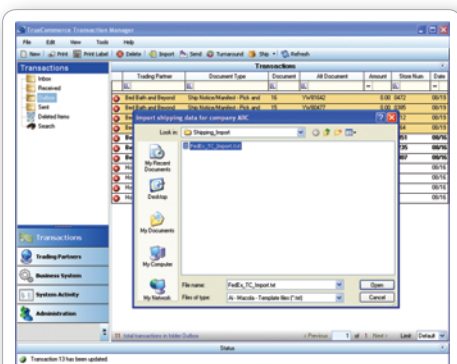

With Transaction Manager™ Shipping Module Users Can Further Enhance EDI Processes.

## The Transaction Manager Shipping Module:

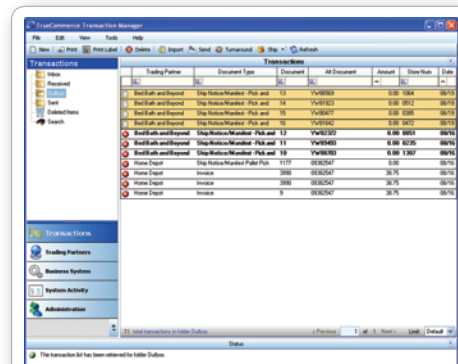

- Provides integration with shipping systems such as UPS and FedEx.
- Decreases time spent manually entering shipping data.
- Reduces data entry errors.
- Retrieves critical shipping data and transmits between software packages.
- Enables users to manage your 3rd party warehouse shipping requirements.
- Eliminates the need for multiple entry points.
- Integrates seamlessly with leading accounting packages and shipping software.

You will be prompted to select from which shipping carrier the file is being imported from. Click "Import" after selecting the shipper.

You will be prompted to select the file to import into Transaction Manager.

The transactions will be updated with the corresponding tracking numbers.

Contact TrueCommerce EDI Solutions today at 1.888.430.4489 for more information about the Transaction Manager Shipping Module.
